SORINTEQ

Course Overview

As digital investigations become more complex, professionals must move beyond basic search techniques and develop technical, scalable, and structured approaches to online intelligence gathering.

The Intermediate I3 Course is delivered as a 7-day blended programme, combining 2 days of guided virtual learning with 5 days of intensive, hands-on classroom training. This structure allows learners to build essential technical foundations before applying them in practical, real-world scenarios.

Building on foundational OSINT skills, the course introduces Linux environments, code-assisted research, automation, and advanced analytical techniques, enabling participants to significantly enhance the depth, efficiency, and sophistication of their investigations.

Who is the course for?

This course is designed for professionals who already have experience in OSINT or digital investigations and want to develop more advanced capabilities, including:

- Corporate intelligence and due diligence professionals
- Fraud investigators and financial crime analysts
- Cyber threat intelligence and security analysts
- Digital investigators and research specialists
- Risk, compliance, and investigative teams

Participants should have either completed a **Fundamental OSINT / I3 course** or have equivalent practical experience.

SORINTEQ

Course Content

Phase 1 – Virtual Learning (2 Days)

Structured remote sessions designed to build technical foundations:

- Linux Fundamentals [Linux 101]
- Introduction to Linux systems and their role in investigations
- Building a Secure Operational Environment
- Configuring and protecting investigative browsers and systems

Phase 2 – Classroom Training (5 Days)

Hands-on, instructor-led training focused on advanced investigative capability:

- Working with Linux in Operations
- Practical application of Linux tools
- Virtualisation and Investigative Environments
- Creating secure, isolated research environments
- Advanced Social Media Investigations
- Investigating global and niche platforms including:
 - WeChat, VK, Reddit, Discord, Threads, and emerging platforms
- Data Enrichment and Media Analysis
 - Image, audio, and video analysis techniques
- Code-Based OSINT Techniques
- Understanding and applying automation and scripting
- Using AI in OSINT Workflows
- Enhancing investigations through AI-supported tools
- Toolsets and Automation
- Leveraging code-based tools for efficiency and scale
- Monitoring Online Threat Activity
- Understanding how digital actors utilise tools and platforms

SORINTEQ

Final Exercise Phase

- Live Investigation Scenario (Capture the Flag)
- End-to-end investigation using Sorinteq's virtual platform
- Integrated Skills Application
- Applying all techniques in a realistic environment
- Debrief and Performance Review
- Structured feedback and learning consolidation

Aims and Objectives of the Course

By the end of the course, participants will be able to:

- Operate within Linux-based environments to support digital investigations
- Use command-line techniques to enhance and automate research tasks
- Build and maintain secure, resilient investigative environments
- Conduct deeper investigations across a wider range of global platforms
- Analyse and enrich collected data using advanced techniques
- Apply structured analytical thinking to support intelligence development
- Understand and utilise code-based tools and automation in OSINT workflows
- Leverage AI to support and enhance investigative processes
- Improve efficiency, scalability, and accuracy in online investigations

Why Choose Sorinteq

Sorinteq delivers university-accredited, practitioner-led training trusted by Government and commercial organisations. Our Intermediate I3 course is designed to bridge the gap between traditional OSINT and technical capability, enabling professionals to conduct more advanced, scalable, and intelligence-driven investigations. Students undertaking courses provided by Sorinteq may earn credits towards formal academic qualifications such as Post Graduate Certificate, Diploma or MSc at the university of Buckingham.

For further enquiries please email info@sorinteq.com or call Sorinteq on +44 (0)333 0063248.

Sorinteq provide all necessary training equipment including laptop computers, internet connectivity, mobile devices and training material.
