SORINTEQ

Course Overview

Cyber-enabled offenders present unique challenges for investigators. These individuals often possess a high level of technical competence and deliberately employ digital tools, obfuscation techniques, and technical narratives to frustrate investigations and undermine evidential integrity.

The Dealing with the Cyber-Enabled Suspect Course equips investigators with the knowledge, insight, and practical techniques required to effectively manage investigations involving technically proficient offenders. The course addresses the full investigative lifecycle — from pre-arrest preparation through warrant execution, forensic strategy, interviewing, and defence mitigation — ensuring investigators are confident, prepared, and technically informed at every stage.

Who is the course for?

This course is designed for investigators and practitioners who encounter cyber-enabled criminality as part of their role, including:

- Law enforcement investigators
- Government investigative and intelligence personnel
- Cybercrime and financial crime investigators
- Regulatory and compliance investigation teams
- Corporate and specialist investigative professionals

No deep technical background is required, but participants should be actively involved in investigative activity where digital evidence or cyber capability is a factor.

SORINTEQ

Course Content

The course covers practical, investigator-focused content across the following areas:

- Understanding the Cyber-Enabled Offender
- Offender typologies, motivations, and common technical capabilities
- Preparation Phase
- Pre-arrest research, intelligence gathering, and tactical planning
- Warrant Execution and Scene Management
- Considerations when searching premises of technically proficient suspects, including device handling and live systems
- Digital Forensic Strategy
- What digital forensics can realistically recover, limitations, prioritisation, and evidential value
- Interviewing the Cyber-Enabled Suspect
- Interview strategies, managing technical complexity, and identifying deception or misdirection
- Technical Defences and Counter-Arguments
- Common defences raised by suspects and how to effectively challenge them
- Case Studies and Practical Discussion
- Real-world examples illustrating investigative success and failure

SORINTEQ

Aims and Objectives of the Course

By the end of the course, participants will be able to:

- Understand how cyber-enabled offenders plan, operate, and defend their activity
- Prepare effectively for arrests involving technically competent suspects
- Conduct and support lawful warrant execution in technology-rich environments
- Develop informed digital forensic strategies aligned with investigative objectives
- Confidently interview cyber-enabled suspects and challenge technical narratives
- Identify and negate common technical defences raised by offenders
- Improve evidential resilience and investigative outcomes in cyber-enabled cases

Why Choose Sorinteq

Sorinteq delivers university-accredited, practitioner-led training trusted by Government and commercial organisations. Our Dealing with the Cyber-Enabled Suspect Course equips participants with specialist knowledge, practical experience, and operational confidence.

Students undertaking courses provided by Sorinteq may earn credits towards formal academic qualifications such as Post Graduate Certificate, Diploma or MSc at the university of Buckingham.

For further enquiries please email info@sorinteq.com or call Sorinteq on +44 (0)333 0063248.

Sorinteq provide all necessary training equipment including laptop computers, internet connectivity, mobile devices and training material.
