SORINTEQ

Course Overview

The Cyber Incident Responder course is an intensive 5-day training program designed to equip participants with the knowledge and practical skills to detect, respond to, and recover from cyber security incidents.

This course provides a hands-on, operational focus for professionals working in-house in organisations or for cyber response companies supporting clients. Learners will develop the ability to respond quickly and effectively to a wide range of cyber incidents, ensuring business continuity and minimising risk exposure.

The training combines interactive lectures, scenario-based exercises, and practical workshops, giving participants confidence to handle real-world cyber threats.

Who is the course for?

This course is suitable for:

- Cyber security professionals working in-house or in client-support roles
- IT and network administrators responsible for incident response
- Staff seeking to enter the cyber security field with a focus on incident management
- Security operations centre (SOC) analysts
- Any personnel involved in cyber threat detection, investigation, and response

No prior incident response experience is required, though a basic understanding of IT and networking concepts is advantageous.

SORINTEQ

Course Content

The Cyber Incident Responder course includes practical, scenario-based modules, covering:

- Introduction to Cyber Incident Response
- Key concepts, incident lifecycle, and organisational responsibilities
- Detection and Identification
- Techniques to recognise anomalies, threats, and breaches
- Initial Response Procedures
- Containment strategies, isolating affected systems, and mitigation tactics
- Investigation and Analysis
- Gathering forensic data, understanding attack vectors, and evidence handling
- System Recovery and Restoration
- Restoring operations safely while preventing recurrence
- Reporting and Documentation
- Writing effective incident reports and communication with stakeholders
- Hands-On Practical Scenarios
- Simulated cyber incidents to develop operational skills
- Incident Response Planning
- Integration of incident response into organisational cybersecurity policies

SORINTEQ

Aims and Objectives of the Course

By the end of the course, participants will be able to:

- Detect and identify cyber security incidents effectively
- Respond to incidents with structured, methodical approaches
- Recover systems and networks safely after an incident
- Conduct initial investigations to determine scope, impact, and remediation actions
- Apply best practices for incident documentation and reporting
- Integrate incident response procedures into organisational policies and business continuity plans
- Improve operational readiness and resilience to cyber threats

Why Choose Sorinteq

Sorinteq delivers university-accredited, practitioner-led training trusted by Government and commercial organisations. Our Cyber Incident Responder Course equips participants with specialist knowledge, practical experience, and operational confidence, ensuring they can effectively protect clients and organisations from ransomware threats.

Students undertaking courses provided by Sorinteq may earn credits towards formal academic qualifications such as Post Graduate Certificate, Diploma or MSc at the university of Buckingham.
